**Use-Case-Realization Specification: <Use-Case
Name>**

Version <1.0>

[Note: The following template is provided for use with the Rational Unified Process. Text enclosed in square brackets and displayed in blue italics (style=InfoBlue) is included to provide guidance to the author and should be deleted before publishing the document. A paragraph entered following this style will automatically be set to normal (style=Body Text).]

[To customize automatic fields in Microsoft Word (which display a gray background when selected), select File>Properties and replace the Title, Subject and Company fields with the appropriate information for this document. After closing the dialog, automatic fields may be updated throughout the document by selecting Edit>Select All (or Ctrl-A) and pressing F9, or simply click on the field and press F9. This must be done separately for Headers and Footers. Alt-F9 will toggle between displaying the field names and the field contents. See Word help for more information on working with fields.]

Use-Case-Realization Specification: <Use-Case Name>

1. Introduction

*[The introduction of the **Use-Case Realization Specification** provides an overview of the entire document. It includes the purpose, scope, definitions, acronyms, abbreviations, references, and overview of this **Use-Case Realization Specification**.]*

1.1 Purpose

This document describes how HANU students submit assignments in FIT Portal is realized within the design model, in terms of collaborating objects.

1.2 Scope

This document applies to the FIT website which will be developed by Moodle basis

1.3 Definitions, Acronyms, and Abbreviations

- Users:
 - + Students: who logged into FIT Portal as learner (can enroll course, submit assignments, etc...)
 - + Teacher: who logged into FIT Portal as a teacher (can post announcement, grade assignments, etc....)
- Guest: Who can log in as a guest

1.4 References

none

1.5 Overview

*[This subsection describes what the rest of the **Use-Case Realization Specification** contains and explains how the document is organized.]*

In the following section, Use-Case Realization Specification of the Enroll Course Use-Case of the Online Learning System is provided in detail. The first section is a textual description of the Use-Case specification. The following section contains diagrams (sequence and class diagrams) describing how the use case is realized in terms of collaborating objects.

2. Flow of Events—Design

This diagram will describe the flow of events of use case: submit an assignment

2.1 sequence diagram

2.2 class diagram

3. Derived Requirements

[A textual description that collects all requirements, such as non-functional requirements, on the use-case realizations not considered in the design model, but that need to be taken care of during implementation.]
